XORFONE- USER MANUAL

XOR DIGITAL SOLUTIONS

XOR DIGITAL SOLUTIONS

XorFone Log In

At the login prompt, provide the 'username' and 'password' sent to you through SMS and/or e-mail provided to society admin office.

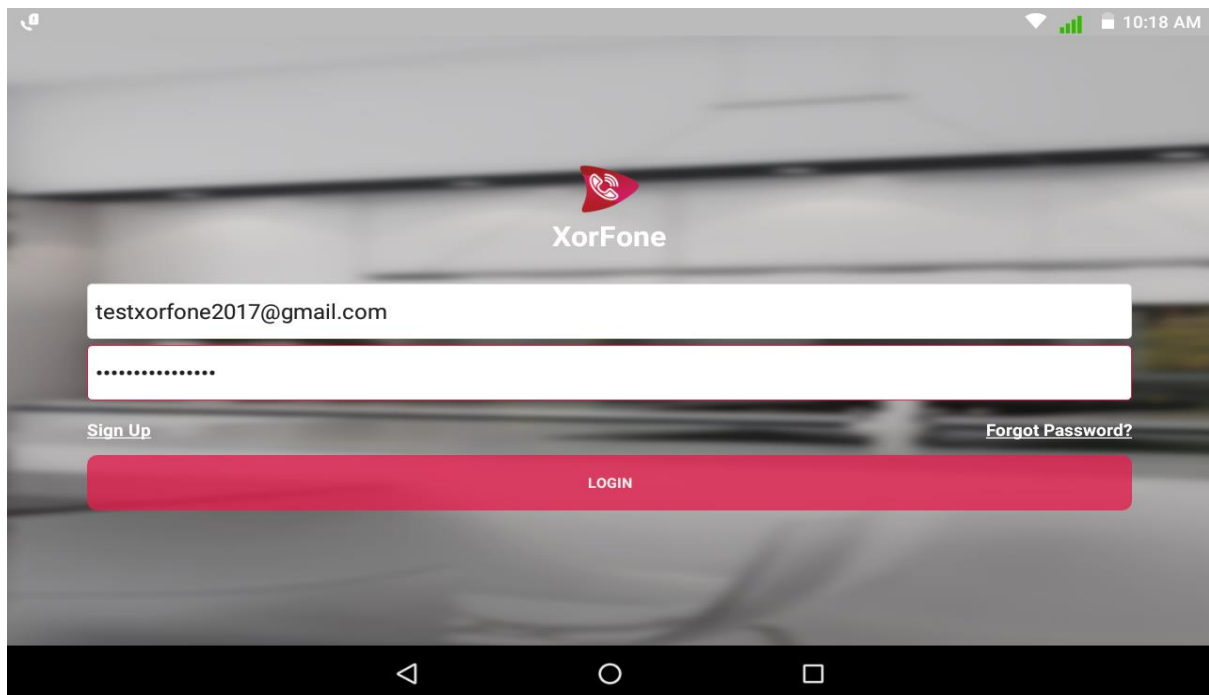

Fig. 1

Change Password/Forgot password

We advise you to change password after first login. To change password or if you forgot your password, press 'Forgot Password' link at the right bottom corner of log in prompt (Fig. 2) and follow the instructions.

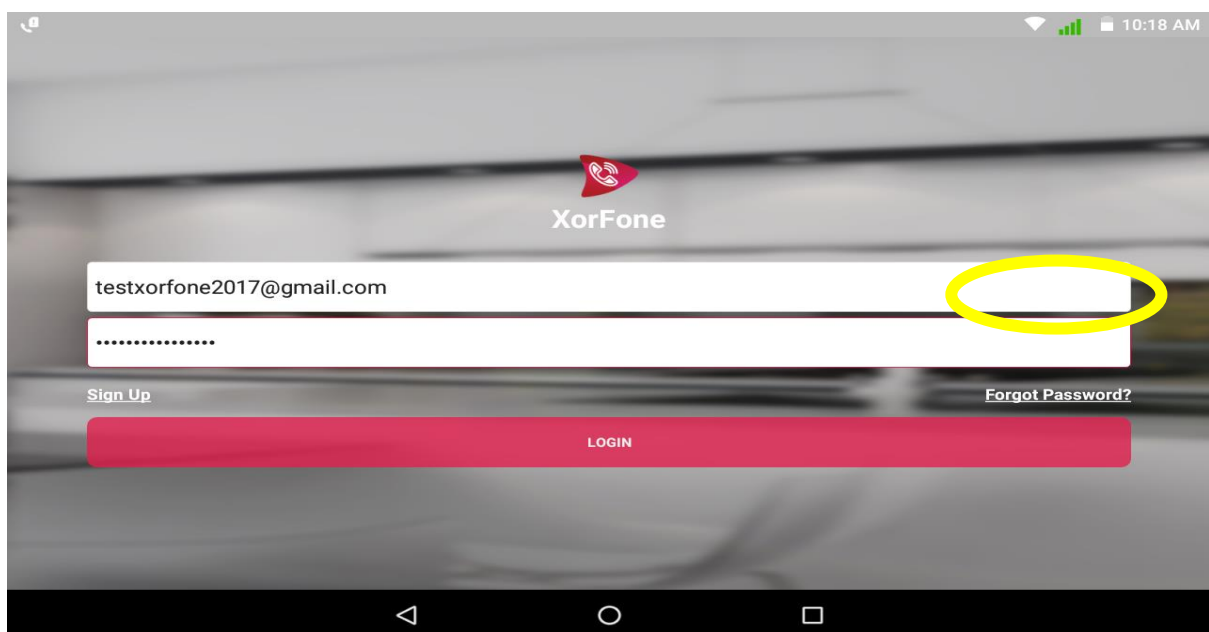

Fig. 2

Home Page

After logging in, the home page is displayed as below. Select the three bars at the top left corner of the screen to go to 'Settings'.

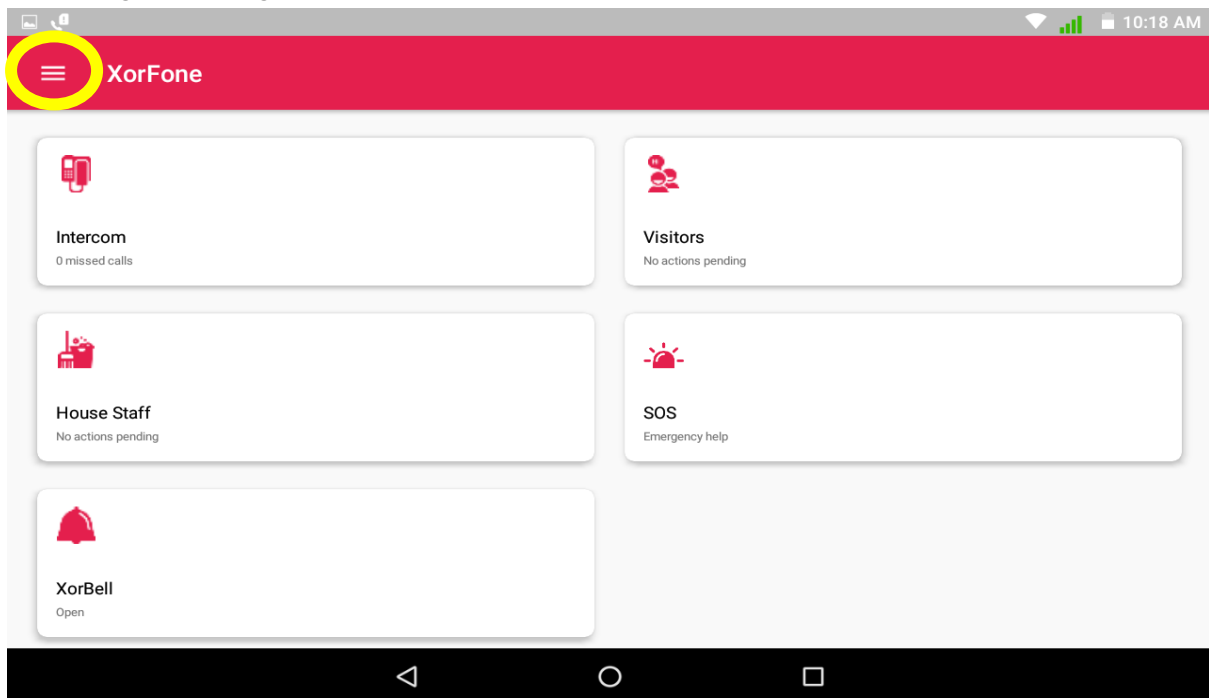

Fig. 3

The settings screen would appear as the left column on the screen. Check the information regarding your house number and society at the top of the left column. Now, select 'Settings'

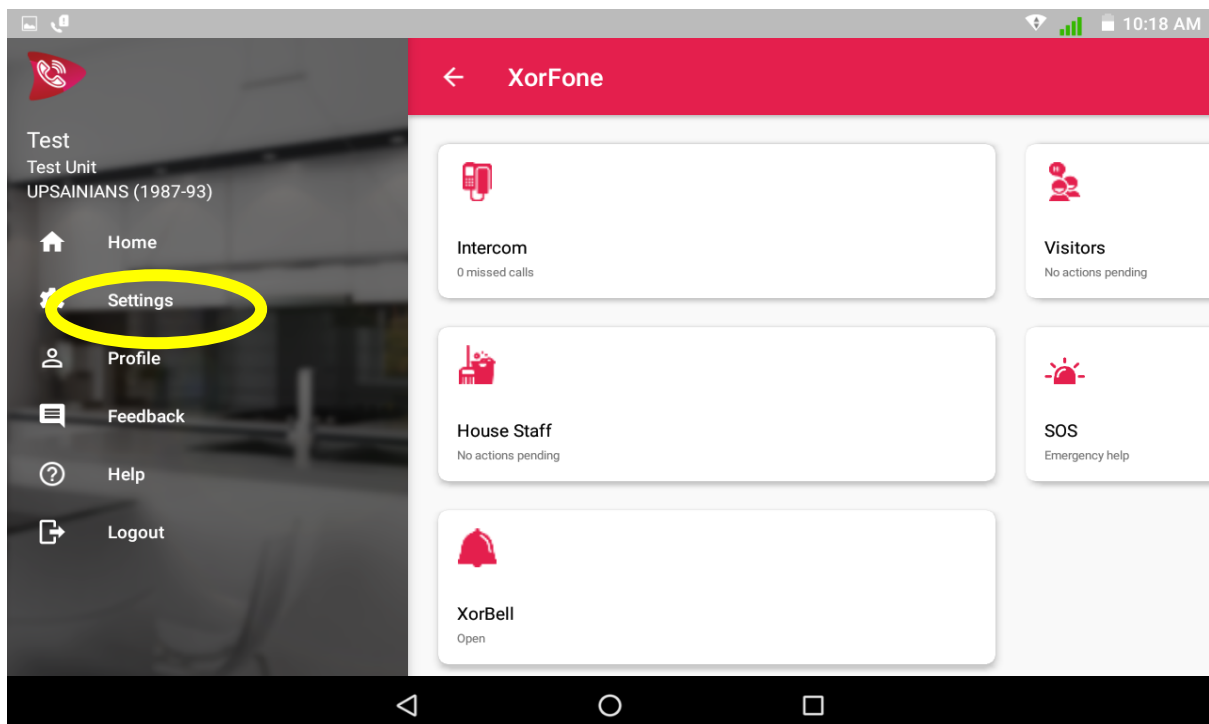

Fig. 4

Settings for Xorfone Application

Once you select 'Settings', you will come across the following screen. It has 3 options – Device Configuration, SOS and Terms and Conditions. We will select Device Configuration first.

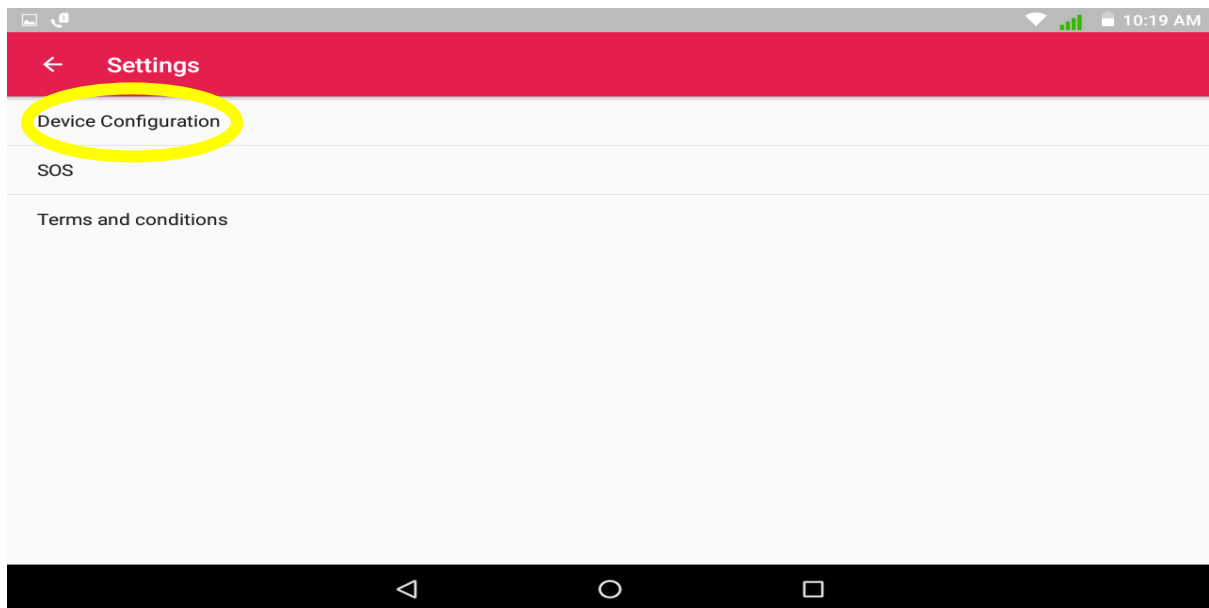

Fig. 5

Device Configuration

The device configuration settings are used to set the required information for 'Intercom' Feature of the app. On this screen press the 'Add Phone Number' button to add any GSM number. This number will be available to caller in case you are not on internet.

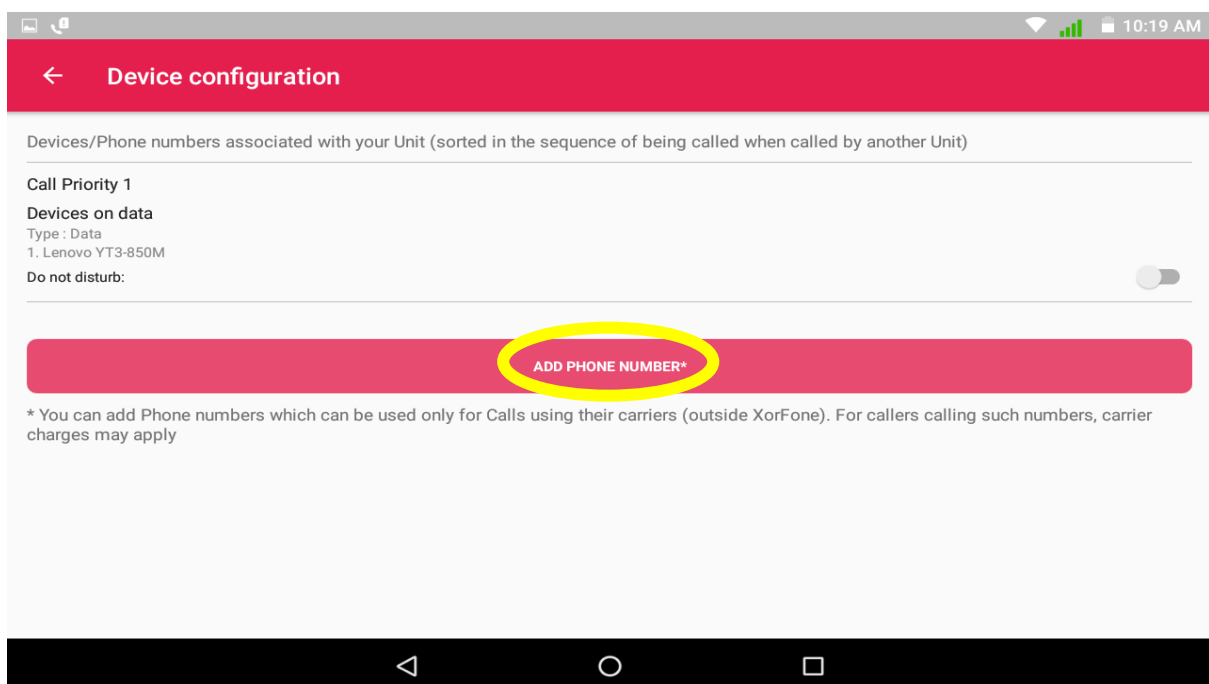

Fig. 6

For demo, we have added the phone number in the screen below.

Fig. 7

Fig. 8

You can add 2 number here and can use the arrow sign to set the priority of call out (**Green circle**). This means using the arrow sign to move the numbers up or down, you can decide which number you want to

be called out first. You can also select the 'Do Not Disturb' if you don't want the intercom calls to be sent to your phone (**Red circle**). You can also add or delete numbers in real time. Once you are done, select the 'back arrow' (**Yellow circle**)to go to previous screen to confirgure more parameters.

SOS Settings

Once you are back to previous screen, now select 'SOS' to configure SOS. In this screen, you can add mobile numbers from your 'Contact List' only. You can add maximum 3 mobile numbers. In case of emergency, when you press 'SOS' button on home screen, the pre-defined SMS message along with your google map coordinates is sent to these mobile numbers.
